Comments.

- (1) The information confirms previous reports on the entraining of both the unidentified engineer regiment of the COFC from the southern section of the Delius Kaserne and elements of the 2d Gds AAA Div from the Hohenlohe Kaserne as stated in paragraph 2. All of the six sources of the present report stated that the loading process started on 2 July 1951. The fact that, according to the present report, the engineer regiment took along officers' dependents, machinery, and disassembled wooden barracks from its camp at Koenigswald, is suggestive of the unit's reassignment from the Potsdam to the Bernburg military post. 25X1A
- (2) The trucks towing AA guns of the 2d Gds AAA Div probably also entrained rather than leaving the city by road.
- (3) Same source reported the arrival there of about 1100 MGs and EM from Wildpark on 20 June 1951. 25X1A
- (4) According to the vehicle numbers, the column mentioned in paragraph 2 belonged to the 2d Gds AAA Div and those mentioned in paragraph 3 and 12 to the unidentified artillery division in Potsdam.
- (5) The departure of the units in the Ruinenberg Kaserne is reported for the first time.
